

Boeing Plant and Future of Flight Tour

Date: Sunday, January 13, 2008
Hours: 8:30am – 12:00pm
Price: \$20.00 per person

Boeing Company and the Everett product line, the 747, 767, 777 and the new 787. This fascinating tour gives insight into the many facets of the airplane industry. On the Boeing flight line, you will see airplanes in various stages of flight test and manufacture for airline customers around the world.

Following the Boeing Assembly Plant Tour, your guests will return to the Future of Flight Aviation Center where they will soar into the new world of commercial aviation in this high-tech facility. The Future of Flight offers visitors the chance to explore the most recent developments in aviation technology. The 73,000-square-foot Future of Flight Aviation Center is a unique interpretive facility designed to showcase the phenomenon of commercial jet aviation and production. From interactive exhibits to the only tour of a commercial jet assembly plant in North America, the Future of Flight Aviation Center draws more than 200,000 visitors per year from around the world. Featuring hands-on exhibits, videos, graphics and interactive stations, guests have the opportunity to digitally design their own jet, try out the next generation of in-flight entertainment systems, touch the high-tech “skin” of the new Boeing 787 and learn how technology and aviation can serve and change agents to connect people and cultures across the globe. You can even stand inside a 777 engine for a unique photo op (as seen on TV).
